

Sanbornton Town Park Committee Minutes-DRAFT
November 10, 2022
Sanbornton Town Library
5:30-7:00 PM

Present: Barbara Whetstone, Chair; Bob Lambert, Selectmen's rep; Patty Kasparian; Jenn Dykstra; Colleen Longo; and Will Ellis, Planning Board rep.

A. The minutes of October 13, 2022 were read and approved without changes. Moved to be accepted by Patty, seconded by Bob, accepted by all present.

B. Bob reported that Jenn Dykstra may be sworn in as a new voting member to the committee. Jenn will see Julie Lonergan to be sworn in.

C. The following tasks were addressed:

1. Barb will meet with Scott Auger to discuss a quote for doing excavation at the town park. She will provide him with a topographical map of the park.

2. The sewage disposal system at the town park will need to be inspected to assess its viability. Barb will contact Rick Lepene to identify if his company installed the system. She will also contact Mark Ledgeguard regarding having the system inspected.

3. The committee discussed how to deal with the sand at the town park: possible usage by the roads department; put the sand up for sale to outside companies; offer to town residents; add sand to the town beaches which would probably require a wetlands permit. Bob will talk with Johnny VanTassel about town usage. Jenn will contact Beth Pavnick with J&L Excavation to inquire if they are interested.

4. Colleen asked if we need to go out to bid for all projects. Bob did not think so.

5. The committee discussed where to move the town owned storage trailer off the park. The recreation department will probably need to keep the trailer for storage. The transfer station and the town garage area were suggestions.

6. Jenn obtained a quote from Paul Smith at Morton Buildings for a 1200 square foot building, 30x40 feet, for \$80000. This does not include the foundation. We would need a 30x60 foot building to include a pavilion. Jenn will contact Paul again to inquire about a 30x60 foot building and what would be included in the cost.

7. Patty will contact Amanda, Recreation Coordinator, to discuss her storage needs for recreation activities.

8. Will reported that there is only single phase power to the park. The estimate from Norm Harris at Gilford Well will need three phase power. Barb will contact Norm for a quote for a well pump connected to a phase one power system.

Next meeting: December 8, 2022, 5:30pm at the Town Library.

Respectfully submitted,
Barbara Whetstone, Chair
